FOR YOU, BY YOU.

THE WHY BEHIND THE SHIRT.

Allmade Apparel was founded in 2017 by screen printers whose main goal was to create a better shirt to print on. They traveled to Haiti, where they learned of the negative impacts apparel manufacturing has on the environment as well as the poor conditions and low wages endured by the shirt makers. They made it their mission to produce a shirt with less impact on the environment that also provided fair wage jobs in ethically operated workplaces.

A BETTER T-SHIRT STARTS WITH BETTER RAW MATERIALS.

Over 60 million plastic water bottles are thrown away each day. With every Allmade tri-blend shirt, you help prevent about 6 water bottles from going into landfills and waterways.

Allmade tees are created with less water than conventional tees, so there's more H2O left for living things. Also, our entire line is now carbon neutral! We calculate all the carbon emissions generated during the product's life cycle and use carbonfund.org to offset the emissions. We also have solar panels on the rooftops of our cut & sew factory, which provides electricity to the building. We hope to be trendsetters in our industry and encourage others to join us in putting people and the planet first.

All of our products are Carbonfree® Certified!
